CAREER OBJECTIVE

Results-driven BTech student with a strong focus on backend development, experienced in building robust web applications, managing databases, and developing scalable APIs. Skilled in Python and backend technologies, with additional exposure to AI and Machine Learning. Demonstrated strong teamwork and problem-solving skills through successful internships, client projects, and national-level hackathons.

EDUCATION

KGISL Institute of Technology, Coimbatore, Tamil Nadu
Bachelor of Technology in Artificial Intelligence and Data Science
2022 - 2026 | CGPA: 8.2

SKILLS

Languages: Python, C, CSS, HTML, JavaScript.

Frameworks: Django, Flask, fastapi, express, React.js, Angular.js, TensorFlow, PyTorch.

Databases: PostgreSQL, MySQL, Supabase, Firebase

Tools: GitHub, Chatgpt

PROJECTS

- **Website for Incubation Center:** Developed a CRM and project management tool using Django for student-mentor collaboration.
- **Hackathon Management Website:** Designed a Django-based platform for team registration, idea submission, review, and abstract submission to streamline hackathon management.
- **Agri-Trade Platform (Client Project):** Built a Django web app for buying and selling rice, paddy, and pesticides with three-role login support for a consultancy client.
- **Sociopotent (Client Project):** Built a Django-based assessment platform for 10th and 12th-grade students to evaluate aptitude and receive personalized career guidance.
- **Ergonomics Analysis App:** Developed a Flask app using MediaPipe to analyze employee posture and generate a risk meter report for workplace ergonomics assessment.
- **Contact Center Knowledge Management Tool:** Created a decision tree-based chatbot with translation and machine learning capabilities, built during the Smart India Hackathon.

INTERNSHIPS & FREELANCING

- KGX Innovation Cell – Backend Developer (Django) - August 2024
- Pinesphere – Backend Developer Intern (Django) - March 2025
- Sociopotents – Backend Developer Intern (Django) - May 2025

LEADERSHIP & COMMUNITY INVOLVEMENT

Member & Backend Developer – IPS Tech Community, Kgisl Institute of Technology.

Contributed to technical event organization and developed backend systems for managing community activities and inhouse projects.

CONFERENCES AND HACKATHONS

- **PyCon India 2023**, Hyderabad - National level conference.
- **AZConf**, Chennai - Conference.
- **Gen AI Hackathon**, SNS Institution of Technology.
- **Smart India Hackathon** Grand Finale - National level hackathon.
